

The More You Know

March 5, 2025

MV Marine Valves Secure Your Peace.

Milwaukee Valve Company has been manufacturing valves for United States Navy ships for over 60 years. Located in Prairie du Sac, Wisconsin, our foundry and manufacturing facility is held to the highest quality standards to ensure the safety of our warfighters.

Our foundry uses leading-edge technology. At our environmentally friendly facility, we pour eight different bronze alloys, in addition to Monel alloys. These metallurgical skills are unique to Milwaukee Valve, affording us the flexibility to provide superior service, not only to our U.S. Navy customers, but also to our commercial & industrial customers. This capability makes certain that all our customers receive a level of quality and safety not readily available elsewhere.

Milwaukee Valve manufactures valves in pipe sizes of 1/4" to 48". Today our valves are installed on all U.S. Navy ship platforms. These applications include Virginia and Columbia-Class submarines, DDG Destroyers and Ford-Class Nuclear-Powered Aircraft Carriers, the largest ships in the world.

Milwaukee Valve Company and its more than 700 worldwide employees are proud to support our U.S. Navy's shipbuilding program. Our military contracts demand the highest possible quality standards in valve design and production. That's because the U.S. Navy requires them for all the valves they buy. We're subject to stringent inspections that monitor quality control in our plants. Because of these demands, it's only natural that we took this refined product development model and applied it to our commercial and industrial valve lines, too. We incorporate strict quality control in all production, in our Wisconsin factories, our wholly owned operations and with our supplier partners in the U.S. and around the world.

Let us help you find the best valves for your application. For more information, visit our [Marine Valves](#) products page on the Milwaukee Valve website. For assistance with a specific problem, contact your [Milwaukee Valve sales representative](#). Their experience and industry knowledge will simplify finding a solution to your product and application requirements. You can see our entire line at www.MilwaukeeValve.com.
