Milwaukee Valve Is A Proud Supplier To The Silent Service!

National Submarine Day was yesterday, April 11, when the contributions of the US Navy's submarine fleet are recognized. The day observes the purchase of the USS Holland, the first modern commissioned submarine.

USS Holland (SS-1), first commissioned U.S. Navy submarine

Each year, we join our partners in the Submarine Industrial Base Council (SIBC) in recognizing National Submarine Day. Along with more than 5,000 U.S. companies providing critical materials to the U.S. submarine programs, members range from the smallest specialty shops to manufacturers of main propulsion equipment.

The Virginia-class attack submarine USS Oregon (SSN 793)

For more than 50 years, Milwaukee Valve has been

manufacturing valves for use on all United States Navy warships. We are proud of that heritage and maintain this commitment with participation on the new Virginia-class fast-attack submarines, as well as with the Columbia-class missile submarines, the newest and most advanced weapons platform in the world, currently under construction.

Please join us in celebrating the values, accomplishments, and contributions of U.S. Navy Submarines. For more information on Milwaukee Valve's Marine products, visit
