The Intricate Route to Market: A Valve's Journey from the Drawing Board to Your Building

Delays in “the supply chain” are blamed for everything from the new TV that you ordered three weeks ago to tardy parts for your scheduled auto repair. But better understanding of the supply chain, and the opportunities to add value and expertise can make those delays a distant memory.

Join Chris Tarantello, Milwaukee Valve's national sales manager on Wednesday, May 17th as he describes how valves move through distribution chain to arrive in that new hospital under construction down the road.

Each step in the supply chain can provide added-value to improve the final product, from obvious problems like price and delivery to system issues, regulatory trials and space and location constraints.

The webinar will begin at 1:00 (CST) and run for 30-40 minutes, followed by a short Q&A session. Registration is required for Live or On-Demand attendance. A link to the registration page can be found at the [Milwaukee Valve](#) website today or by clicking [HERE](#). Registration is required for Live or On-Demand attendance.
