

## Valve Bootcamp Goes Back To Basics For Gates & Globes

Gate & Globe valves have provided flow control solutions for decades, in fact, the Gate is one of the oldest known valve designs. Engineers, contractors, and maintenance technicians are familiar with hiding these valves behind drop ceilings, in mechanical rooms of most buildings, or serving throughout industrial plants.

Join us for a one-hour webinar as we dive into the details of these multi-turn valves in commercial and industrial applications. Topics include various design options, material selection, installation tips, and application do's and don'ts.

The webinar will begin at 1:00 (CDT) and run for 45-50 minutes, followed by a short Q&A session. Continuing Education Units (CEUs) are available from the American Society of Plumbing Engineers (**ASPE**). Registration is required for Live or On-Demand attendance.
