

# BUTTERFLY VALVE BOOTCAMP

## Butterfly Webinar Recap

On Tuesday, regional manager Jeff Kiefer conducted a Butterfly Valve Bootcamp, including an overview of what butterfly valves are, common features and designs, including materials and styles, pressure-temperature limits, industry standards, application suggestions and restrictions.

The 45-minute webinar provided an excellent introduction to butterfly valves and an understanding of the role of the butterfly valve in mechanical systems.

If you missed the webinar, you can view it [HERE](#), or pass it along to others within your organization. (Registration required.) This webinar qualifies for CEU credits from ASPE, even if viewed on-demand.

Our next Webinar will be on Tuesday, June 22. The material will cover [Best Practices for Valve Selection and Installation](#). Look for more information.
