

The More You Know

June 21, 2023

Just Press, Crimp and Save.

UltraPress® line saves more time than ever.

Designed for piping potable and domestic water, HVAC and inert gases at 200 psig or less.

No more messy, multi-step brazing, soldering or threaded installations.

Time is money — save both with UltraPress®.

- Reduce installation time up to 68% — triple your productivity.
- No custom tools — use standard tools to press into place.
- No more mess, risk or costs of hot soldering and brazing.
- Water service connections and repairs can be made wet or dry.
- Fully annealed for extra strength, flexibility and sealing power.
- Ball, gate, globe and check valves — in brass, bronze and lead-free UltraPure®.
- Press-fit/threaded-end combination available on ball valves.
- Rigorously tested for reliability you can count on.
- All Milwaukee/Hammond Valve extensions and accessories are available.

For more information, you can download the UltraPress brochure [HERE](#) or the UltraPress FAQs [HERE](#). For questions or assistance on specific press valve applications, visit our website at
