Files for individual products can be found by navigating to the TØV product pages for stainless or carbon steel bodied valves, and clicking on the link under **View 3D CAD Drawing(s)**. Or under the **BUTTERFLY** section of the 2D and 3D CAD Files tab on the Milwaukee Valve

website, or by clicking [HERE](#).

Part of Building Information Management (BIM), CAD software helps designers create 2D or 3D representations to better visualize construction. CAD enables the development, modifications, and optimization of the design process. It also contains all of the pertinent information for each of the elements in each system, including materials, dimensions,

weight, spatial relationships and allowances, environmental relationships and allowances, etc.

Milwaukee Valve's online catalog makes it easier for customers to download the digital models they need into their CAD or BIM design software. The 3D part catalog now features 150+ CAD and BIM formats, including Autodesk REVIT®.

For more information and to sample the easy-to-use interface, visit the [2D & 3D File Page](#) at www.MilwaukeeValve.com or contact your Milwaukee Valve customer service rep today. A complete listing, by Rep territory, can be searched at our website, at www.MilwaukeeValve.com/Find-Sales-Rep/.
