## When It Comes To Big Iron, Milwaukee Valve Has The Metal!

Milwaukee Valve has more than 120 years of experience in the valve industry. Iron gates, globes and check valves are one of the pillars of our product offering. The weights, patterns and designs of our products have been tested and refined to meet the highest industry standards and to give your customers complete peace of mind.

Often, large diameter (14-inch +) gate valves may not be readily available from local distribution sources, due to the large sizes and challenges related to handling them, not to mention the cost to carry that inventory. But Milwaukee Valve stocks these large sizes and can ship from stock, even direct to job sites in some instances.

Iron gate valves are available in sizes ranging from 2- thru 24-inch and in 125 & 250 lb. classes.

Materials of construction include IBBM, all iron and 3% nickel. For more information, just click [GATE](#).

For pricing and delivery information, contact your Milwaukee Valve customer service rep today. A complete listing, by territory, can be searched at our website, at [www.milwaukeevalve.com/find-sales-rep/](http://www.milwaukeevalve.com/find-sales-rep/).
