

**In this time of gratitude,
all of us at
Milwaukee Valve
want to wish you and yours
a very**

*Happy
Thanksgiving!*

VALVE TESTING BOOTCAMP

Valve specification is more stringent than ever. In order to meet these rigid requirements, valve testing is an essential part of the valve production process. Ever wonder how a valve manufacturer checks the integrity of their mass-produced valves? This webinar provides an in-depth explanation of the most common valve-testing processes used across valve manufacturers. [Join us](#) as Ryan Murphy, Milwaukee Valve's Director of Product Development walks through the standard factory testing required before a safe and reliable product can be shipped to the construction site.

This webinar is eligible for ASPE CEU credit. Upon successful completion of the course, learners will be able to:

- Identify key factors that determine the type and method of required valve testing.

- Understand and apply basic valve testing terminology and common testing standards.
- Understand types of valve testing including shell, closure, and backseat testing.
- Observe different testing methods and interpret the acceptance criteria.
- Understand misconceptions related to leak testing, and apply that information when selecting and installing valves.

Check us out on [Tuesday, December 7](#). The webinar will begin at 1:00 (CDT) and run for 45-50 minutes, followed by a short Q&A session. Continuing Education Units (CEUs) are available from the American Society of Plumbing Engineers (**ASPE**). A link to the registration page can be found at the [Milwaukee Valve](#) website today or by clicking [HERE](#). Registration is required for Live or On-Demand attendance.

Holiday Hours...

Our offices and manufacturing plants will be closed on December 23rd, 24th, 30th and 31st in observance of the Christmas and New Year's holidays. The Sales office will reopen on the 27th, 28th and 29th. During this time the plants will be performing maintenance and starting our annual physical inventory in the warehouse. The last day for shipments will be on Wednesday, December 22nd. We will be fully staffed on Monday January 3rd with normal operations in the office, plant, and warehouse. We expect normal shipping to resume on January 3rd.
